

REPAIRS TO AFFECTED TOWERS OF AWHO PROJECT,
SILVER SAND ISLAND, KOCHI

AWHO Silver Sand Island project was completed in July 2018, wherein a total of 264 Dwelling Units were constructed. Certain repairable aberrations have come to light in the project. AWHO has already initiated necessary measures to address these since 2021. M/s Bureau Veritas India Private Ltd (BVIL) has been engaged, in consultation with the Chanderkunj Army Towers Apartment Owners Association (CATAOA), to undertake necessary inspection, tests and analysis, culminating in corrective repairs to be undertaken by a reputed construction agency under the supervision of M/s BVIL. All this is being done with full knowledge and approval of the CATAOA.

AWHO reiterates that it is committed to undertake necessary repair of the building in pursuance of its welfare oriented policies and ethos.
